## Damanhur - An Inspiration of What Society Can Be!

### ***A Dream Fully Realized of a Real-Life Spiritual and Social Community***

Damanhur, named for the ancient Egyptian "city of light," is a vibrantly dynamic spiritual community and alchemical mystery school dedicated to the unification of art, spirituality, and technology. Born from a dream by Oberto Airaudi, spiritually named Falco, inventor, artist, scientist, and philosopher, he gathered together 12 spiritual visionaries and founded Damanhur in 1977. Damanhur has since inspired new leaders of research in sacred art, music, language, organic agriculture, medical arts, and time travel. Damanhur has a social and political structure, a constitution, economic activities, schools, daily paper, and its own currency. Their textiles, stained glass, mosaic tiles, and silk clothing are exquisitely beautiful.

The Temples of Humankind in Damanhur, sometimes called the 10<sup>th</sup> Wonder of the World, is a fully underground temple of vast corridors that lead to breathtaking inner temples filled with wall to wall art. Deep within the Temple's inner structures is a highly intricate system of 'Selfic technology' – a gigantic battery composed of 300 tons of detailed energy-conducting circuits, connections, and pathways made of virtually every mineral and metal known. Damanhurians say the ancient science of 'Selfica' — the practical use of spirals (basic form of our universe) and metals concentrate and direct vital energies. This technology is a very important aspect of life in Damanhur, not only for time travel research, but for enhancing personal health and energy management, stimulating creativity and insight, accessing deep states of meditation for spiritual growth, and the appreciation of art and beauty.

One of the most powerful and peaceful vortexes on the planet, Damanhur's underground temple is located at the apex of four major synchronic lines. Lhasa, Tibet and Damanhur, Italy are the only two known points where four of these lines meet, circulating the earth's energies and storing large amounts of energy in rock formations. The Temples of Humankind is carved completely inside a vein of Mylonite, a rare mineral characterized by its ability to transport the physical energies of the earth. Human generated energies through ritualistic dancing, chanting, meditating and singing serve as a centerpiece of social and spiritual life, and can be stored by the Temple's circuitry. Damanhurians believe there is a precise relationship between the extension of decorated surfaces and amount of energy generated. For example, glass is often used to double the surface area and the energies of the art.

Since 1994, Damanhurian researchers have successfully conducted experiments, determining two main ways to time travel; i.e., with the physical body and with consciousness and subtle bodies. Damanhurians believe that we have many possible realities and that the more we consciously choose create a better world, the greater the force will be towards the creation of a new timeline, one based upon world unity.

## Meditation Leader

SFF welcomes Bishop Magi Teggin, who will be visiting from England, to lead the meditations on February 3. Magi's spiritual path has led her to explore many practices including Druidry, Buddhism, Christianity, Taoism, Islam, Hinduism, Yoga, Native American Indian Traditions and more. She has been guided to found the Order of the Open Heart and is a consecrated Bishop in the multi-faith Madonna Ministry.

A Gongmaster and a Reiki Master, Magi works with sacred sound and silence and is the guardian of two crystal skulls, working with the consciousness of Gaia Star (i.e. the Universal level of consciousness holding the potential for the future of planet Earth), the group consciousness of all crystal skulls and Divine consciousness as appropriate. Magi is an Awakener and Pathfinder and continues to lead groups and individuals on journeys of transformation around the planet through initiations, attunements and activations in service to humanity, Earth and the Divine.

Having visited Damanhur herself and experienced its unique energy, Magi is the perfect person to lead the meditations on this evening.

**Early meditation begins at 6:30 pm, and will be held in the Ralph Waldo Emerson room of the Unitarian Universalist Fellowship of Raleigh.**

This is the same building (Peace Hall) as the Clara Barton room, where we held meditations at UUFR in years past, but the Emerson room is on the lower level of that building. If coming from the front parking lot, go down the steps between the two buildings. There's an entry door on the right side of Peace Hall. Go in this door and down the hall, and the Ralph Waldo Emerson room is on the left at the end. If coming from the back parking lot, go up the steps between the main building, which houses the sanctuary in front and Fellowship Hall in the rear, and Peace Hall, the building to the left. Entry door will be on the left a short distance up the stairs.

Please be on time and take your seat quietly so as not to disturb the energy of the meditation. Thank you!
