# QUANTUM PHYSICS & ENERGY HEALING

September 3, 2015 at UFR

**Dr. Mary Asterita-Robol**

### ***How Does Quantum Physics Explain Energy Healing?***

7:15 pm - Admission: \$10; Seniors & Students \$8

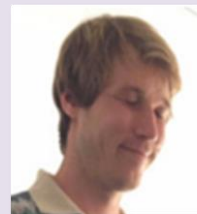

Dr. Mary Asterita-Robol, a former nun with a Ph.D. in Physiology and Biophysics from Cornell plus a Doctor of Osteopathic Medicine, has spent decades researching the mind-body connection. She will show how quantum physics reveals the availability of a vast energy field that is totally within our grasp. This field of energy is very much influenced by our state of consciousness and tied to the art of energy healing.

Dr. Mary Asterita-Robol will describe the electromagnetic spectrum and its possible extension into the spiritual realms of light, the concept of vibration, and how we relate to a holographic universe. As an added bonus, she will play the "Angel Harp"—an autoharp tuned using channeled angel energies—that is "a profound integration [of] the highest vibration of musical tones and the angelic realms of Universal love and light."
