Modern medicine emphasizes high tech diagnostic methods such as MRI and laboratory tests, but dreams have provided useful information in medical diagnosis for centuries. **Dr. Larry Burk** recently published a survey of 18 women from around the world whose dreams provided remarkably accurate warnings of breast cancer, including location and healing guidance. Now working on a follow-up book of more cases, he hopes to encourage everyone to keep dream journals and return dreams to a position of importance in the holistic medicine of the future. Dr. Burk was a founding member of the American Board of Scientific Medical Intuition and a board president of the Rhine Research Center. His book *Let Magic Happen: Adventures in Healing with a Holistic Radiologist* was published in 2012.

SFF meets the first Thursday of every month except July
