presents

Spirit Attachment and Spirit Releasement Therapy (SRT)

Join us for a captivating presentation about spirit attachments and their remedies.

Steve Barrell, MA, CHt, says if consciousness functions independently of the physical body (and there is considerable evidence to suggest that this is so), then it stands to reason that our own consciousness is only temporarily attached to our own body. What prevents another consciousness, one that currently lacks a body, from attaching to our body at the same time that we are attached to it? What can be done to prevent it, and if it should happen, what can be done about it? Spirit Releasement Therapy (SRT) addresses these questions.

In his presentation about Spirit Attachments and Spirit Releasement Therapy, Steve surveys different scenarios that can affect a person's ability to function independently of other consciousnesses, and how these are remedied.

Steve Barrell is a practicing transpersonal hypnotherapist in Durham, trained by the International Association for Regression Research and Therapy in San Diego, and specializing in Past Life Regression Therapy (PLRT) and Spirit Releasement Therapy (SRT). He is president of Haunted North Carolina, Inc., he is a seminarian at the United Metaphysical Churches of Roanoke, VA, and an associate of the Rhine Research Center, where he consults on hauntings and leads the Dreams Study Group.
